

APPLICATION FOR WATER SERVICE

I acknowledge that I am responsible for damage to Utility property caused by my invitees, my agents, myself, and others under my control. I agree to take no actions to create a health hazard or otherwise endanger the Utility's equipment, its personnel, or its customers. I agree to put no unusual, non-domestic service demands on the Utility system without notice and permission from the Utility. I acknowledge that I may not resell or give water service to another nor extend water service from my meter or service line to another person or property. I acknowledge that water is provided for domestic purposes only (fire protection excluded).

The Customer will install at his own expense a service line, including a shut-off valve, from the water meter to the point of use. The customer shall hold the Utility harmless from any and all claims or damage to real or personal property occurring from the point the customer ties in the Utility's water meter.

Plumbing Restrictions: The following unacceptable practices are prohibited by State Regulations:

1. No direct or indirect connection between the public drinking water supply and a potential source of contamination exists. Potential sources of contamination are isolated from the public water system by an air gap or an appropriate backflow prevention assembly in accordance with Commission regulations.
2. No cross-connection between the public drinking water supply and a private water system exists. Where an actual air gap is not maintained between the public water supply and a private water supply, an approved reduced pressure principle backflow prevention assembly is properly installed.
3. No connection exists which would allow the return of water used for condensing, cooling or industrial processes back to the public water supply.
4. No pipe or pipe fitting which contains more than 8.0% lead exists in private water distribution facilities installed on or after July 1, 1988 and prior to January 4, 2014.
5. Plumbing installed on or after January 4, 2014 bears the expected labeling indicating $\leq 0.25\%$ lead content. If not properly labeled, please provide written comment.
6. No solder or flux which contains more than 0.2% lead exists in private water distribution facilities installed on or after July 1, 1988.

APPLICATION FOR WATER SERVICE

Customers initiating new water service shall provide a completed "Customer Service Inspection Certification" as required by the Utility's tariff. The customer must provide a copy of this certificate within 30 days after initiating new service.

The customer shall, at his own expense, properly install, test, and maintain any backflow prevention device required by the water system, Copies of all testing and maintenance records shall be provided to the Utility.

The applicant has been given the option to view a copy of the Utility's Texas Commission of Environmental Quality approved tariff and agrees to pay the rate in the tariff and abide by the requirements in this application. **If the customer fails to comply with the terms of this contract, the utility shall, at its option, terminate service or properly inspect, install, test and maintain required equipment and bill the customer.**
